

PRESS RELEASE

10-01-2010

Berliner Glas appoints a CTO

As per October 1, 2010, Volker Schmidt (46) has taken on the newly created position of Chief Technology Officer at Berliner Glas.

In this role he assumes responsibility for all development work within the company group. This comprises the Production and Measuring Technology Division, Production Development as well as future issues in Technology Marketing.

Since joining the Berliner Glas Group in 2002, Schmidt has been responsible for product and technology development in the Photonics Division and since 2006 has been a member of the management board.

By appointing Volker Schmidt as CTO, Berliner Glas has laid an important cornerstone for the technological future of the company, which will benefit our current and future optical systems customers.

About Berliner Glas:

With around 950 employees, the Berliner Glas group is one of the leading European providers of optical key components, assemblies and systems as well as high-quality refined technical glass. With an understanding of optical systems and optical production techniques, Berliner Glass develops, produces and integrates optics, mechanics and electronics into innovative system solutions for its customers. These solutions are used worldwide in the semi-conductor industry, in medical technology, metrology, laser, photo and film technology as well as in analysis, defense and the display industry.
