

## PRESS RELEASE

18 June 2014  
Berlin, Germany

### **Custom designed, high-precision chucks for the semiconductor industry – Berliner Glas Group presents step-by-step set up of an e-chuck at Semicon West**

The Berliner Glas Group has been active in the semiconductor industry for more than 20 years and supplies customers within this market with high-precision, custom designed wafer chucks, precision components, modules and optical systems. These are used in lithography, inspection, metrology as well as 3D integration.

With high-precision production and measurement technologies, functional qualifications, a well-established product development process as well as design expertise using different materials, the Berliner Glas Group designs and produces solutions for its customers that are adapted to their application in an optimal way, that help to improve the overlay and in addition reduce the complexity of the supply chain – and all this by offering competitive prices on a global market.

At Semicon West 2014 in San Francisco the Berliner Glas Group will present examples of its products and solutions. One of the highlights is a new e-chuck. By means of this chuck demonstrator various features will be shown. The Berliner Glas experts who will be present at the show will explain these features and the set up of the chuck and are prepared to answer all questions of interested visitors.

Visit us at Semicon West – booth 2422 in the South Hall.

#### **About Berliner Glas:**

The BERLINER GLAS GROUP ([www.berlinerglasgroup.com](http://www.berlinerglasgroup.com)) is one of the leading European providers of optical key components, assemblies and systems as well as high-quality refined technical glass. With more than 1,100 employees, BERLINER GLAS develops, produces and integrates optics, mechanics and electronics into innovative system solutions for its customers. As OEM partners from prototyping to volume production, the BERLINER GLAS GROUP companies serve innovative customers in various market segments – semiconductor industry, medical technology, metrology, laser and space technology, analytics, defense and the display industry.
