

## PRESS RELEASE

30 May 2017  
Berlin, Germany

### **OEM optical systems for high-tech applications with light – the Berliner Glas Group is presenting industry-specific solutions at the LASER World of PHOTONICS**

The use of technologies involving light opens up many opportunities to find better and more sustainable solutions for numerous applications. The Berliner Glas Group, with its optical components, assemblies and systems, provides an important contribution in making light usable in various applications.

At this year's LASER World of PHOTONICS, which takes place from June 26th to the 29th in Munich, Germany, the Berliner Glas Group will present its industry-specific solutions:

The use of light allows for rapid and gentle therapies in the medicine field. With its optical systems, the Berliner Glas Group is pushing reliable new systems in medical technology.

The company provides, among other things, beam guidance systems and zoomable lenses for ophthalmology, products for the entire visualization in the surgery room, high-resolution multiple chip prism assemblies, endoscopes and autoclavable fixed focal length lenses for endoscopes as well as lens systems, broadband lenses, microscope lenses and laser modules for the area of Life Sciences.

In addition to healthcare, mobility and networking are two additional megatrends for which the Berliner Glas Group provides optical solutions. This includes highly complex assemblies that enable laser communication in space, and thus the exchange of enormous quantities of data in near real time, customer-specific chucks, precise structural components, reference mirrors as well as stages and optical modules that ensure the highest yields in high-performance chip manufacturing, as well as key optical components such as aspheres and cylinder lenses that are used in laser material processing, image processing and quality management.

Berliner Glas KGaA  
Herbert Kubatz GmbH & Co.  
Waldkraiburger Straße 5  
12347 Berlin, Germany

Phone +49 30 60905-0  
Fax +49 30 60905-100

More information as well as the option to arrange a direct meeting can be found on the website: <https://www.berlinerglasgroup.com/berliner-glas-group-laser-world-photonics-2017>.

**About the Berliner Glas Group:**

The BERLINER GLAS GROUP ([www.berlinerglasgroup.com](http://www.berlinerglasgroup.com)) is one of the world's leading providers of optical key components, assemblies and systems as well as high-quality refined technical glass. With more than 1,100 employees, the BERLINER GLAS GROUP develops, produces and integrates optics, mechanics and electronics into innovative system solutions for its customers. As OEM partners from concept to volume production, the BERLINER GLAS GROUP companies serve innovative customers in various market segments – semiconductor industry, laser and space technology, medical technology, metrology and the display industry.
