

PRESS RELEASE

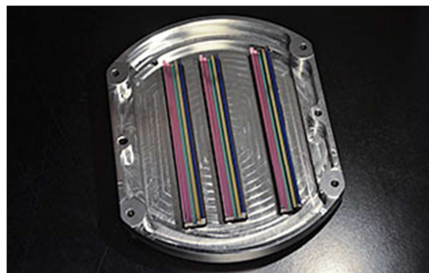

07 September 2017
Heerbrugg, Switzerland/Berlin, Germany

Optical components and systems for geodesy, photogrammetry and geospatial 4.0 – SwissOptic at INTERGEO 2017

SwissOptic AG – a company of the Berliner Glas Group – will present its optical components, assemblies and systems for innovative developments and projects in the dynamic geo sector at INTERGEO 2017. The company will display modules for optic measurement systems like tachymeters, theodolites, laser trackers and laser scanners, high accuracy measurement reflectors used in various applications, lenses and beam splitters for aerial cameras as well as interferometer lenses.

For its customers – the manufacturers of high-precision geodesy and laser-based metrology equipment – SwissOptic is a long-term and reliable partner from concept to volume production. Customers benefit from the experience and comprehensive understanding of metrology systems that SwissOptic has gained during the past years as a reliable development and manufacturing partner for serial products within the measurement industry.

Interested visitors of INTERGEO 2017 will have the opportunity to meet with the SwissOptic experts at the SwissOptic booth in hall 5.1 at booth number B5.022 to get valuable impulses for product creation in the

geodesy and photogrammetry sectors and to discuss the newest product developments.

More information as well as the opportunity to make an appointment for a personal meeting at the exhibition can be found online at:
